Clinton County/St. Johns St. Johns Industrial Park

All existing facility locations are approximate and are not to be used for construction purposes.

Always contact MISS DIG 811 before you dig.

Distribution System

- Predicted reliability of up to 99.95% for 14.4/24.9 kV system.
- The distribution system is located onsite/adjacent to the site.
- Current available capacity is 1 MW. Additional capacity may be available with system upgrades.

46 kV System

- Predicted reliability of up to 99.995%. The predicted reliability percentage represents the estimated amount of time the facility is in service.
- The 46 kV system is located approximately 1.3 miles away.
- Facilities will be sized to meet the energy needs of the customer and available system capacity determined at the time of a specific request.

138 kV System

- Predicted reliability of up to 99.997%. The predicted reliability percentage represents the estimated amount of time the facility is in service.
- The 138 kV system is located approximately 0.4 miles away.
- Facilities will be sized to meet the energy needs of the customer and available system capacity determined at the time of a specific request.

Natural Gas Site Benefits

Electric

Benefits

Site

Distribution System

- Multiple medium-capacity gas mains currently available.
- Up to 10 psig delivery pressures readily available, depending upon customer load requirements.
